

GEMS FOR JOY

# Healing Jewels for a Little Lockdown Lift

Not just a pretty piece.

BY LIVIA PRIMO LACK

## VAN ROBOT

Gold, tanzanite, amethyst, citrine and peridot pendant, £2,750, **Van Robot**

Van Robot brings that much-needed frivolity and all-round fabulousness to your collection. Crafted in yellow gold, these weighty, tactile bijoux-bots are futuristic in design yet made according to classical Tuscan techniques. Art Deco meets sci-fi with geometric, almost architectural designs defining legs and arms that move much like that of a toy robot. They are the perfect fun stress-buster to add to your everyday attire—say hello to your new Zoom conversation starter. Better still, each Van Robot pendant can be personalised with endless precious-stone combinations and colour ways to make a piece that is 100 per cent “you”.
